

**This Stored Procedure tells the most recently contacted person.**

```
CREATE OR REPLACE FUNCTION Recently_Contacted()
RETURNS TABLE (
  RANK INT,
  USERNAME VARCHAR,
) as $BODY$
DECLARE
    var_r record;
    query text;
    r int

BEGIN
    r := 1;
    query := 'select receiverusername, count(receiverusername) as cnt from (select * from
messages where senderusername = 'ankit_aahil') as r1 group by receiverusername) order by
cnt asc';

    FOR var_r IN EXECUTE query
    LOOP
        Rank := r
        Username := var_r.receiverusername
        RETURN NEXT;
    END LOOP;
```
